## Office Action Summary

Art Unit: 1617

Claims 17, 18, 23, 24, 50, 53-61 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for polymerizable material with unsaturation, does not reasonably provide enablement for any polymerizable material. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. VA 044 thermally initiates only addition polymerization, not condensation polymerization. Thus, it appears that applicants' prepolymers must possess unsaturation.

Claim 58 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

"Limited" is vague. It is subjective. What level of toxicity?

Claims 17, 18, 23, 24, 50, 53-61 are rejected.

Claims 51, 52 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Webman whose telephone number is 308-4432. The examiner can normally be reached on Monday-Friday 9am-5pm.
